

GUI.md

```

1
2 ![css containers](img/describe.png)
3
4 <step name="initial">When the app is opened or refreshed, only the top slider is active,
with the teacher able to swipe left, choosing the 'student' option, or swipe right, choosing
the 'class' option.
5
6 ![initial state](img/1_initial.png)
7 </step>
8 <hr>
9 <step name="student"> If the teacher chooses the 'student' option in the
10
11 top slider, then the ID dropdown menu will activate, and the teacher can select the ID
of the student he is interested in retrieving his homework assessments.
12
13 ![student](img/2a_slide_student.png)
14
15 For example, if the teacher swipes the top slider to the left, and then selects 148 from
the ID dropdown menu, this is what the GUI should look like:
16
17 ![student 158](img/3_student_148.png)
18
19 </step>
20 <hr>
21 <step name="class">If the teacher chooses the 'class' option in the
22
23 top slider, then the second slider will activate.
24
25 ![class](img/2b_slide_class.png)
26
27 </step>
28 <hr>
29 <step name="pair">If the teacher swipes the second slider left, then the
30
31 'class code' dropdown menu will activate, and the teacher can select which class he is
interested in retrieving summed scores for each student in that class.
32
33 ![cohort](img/4a_slide_pair.png)
34
35 For example, if the teacher selects the 'pair' option, and chooses class GCP-20, this is what
the GUI should look like:
36
37 ![class GCP-20](img/5_select_class_gcp-20.png)
38 </step>
39
40 <hr>
41
42 <step name="reteach">If the teacher swipes the second slider right, then the
43

```

```
44  **'class code' dropdown menu** will activate, and the teacher can select which class he is
    interested in retrieving summed scores for each student in that class.
45
46  ![reteach](img/4b_slide_reteach.png)
47
48  For example, if the teacher selects the 'reteach' option, and chooses class BCP-180, this is
    what the GUI should look like:
49
50  ![BCP-180](img/6_select_class_bcp-180.png)
51
52  </step>
```
